

VANPOOL SHUTTLE

Personalize your transit service.

Vanpool shuttles allow businesses and their employees to use existing transit by closing the gap between transit stops and the workplace.

UTA bus and rail services can get you most everywhere you need to go along the Wasatch Front. However, if your work location is just a little too far to walk or bike from your employee's last stop or station, or if the overall trip takes too long, a vanpool shuttle might be right for your business.

Employer sponsored vanpool shuttles are another benefit you can offer employees. Not only can you assure that employees safely and effortlessly get to work on time, vanpool shuttles can also reduce your parking demand. Have your employees drive the shuttles or contact UTA to discuss other driving options.

Inclusive turn-key service, everything is included- The van, fuel, insurance, maintenance, back-up van and support and ride match assistance.

Customized service – The employer decides which station and trains the shuttle meets to get employees to work. The shuttle can run only during peak travel times or all day long, and at whatever frequencies necessary.

Employees arrive at work relaxed, happy and on time – In a vanpool shuttle employees travel with their coworkers. It is a fun environment and there is always a comfortable seat available. Employees can choose to read, sleep, work, play games or listen to music.

The benefits – No more wear and tear on employees' cars with expensive maintenance and repair bills. No more wear and tear on your parking facilities either.

Everybody can save money! – Vanpool shuttles are a qualified transportation benefit under IRS code 132(f). This tax code allows an individual to pay for vanpool shuttle costs with tax-free dollars up to \$255 per month. If you have any questions on this benefit give us a call.

And if that is not enough, here is the biggest and best reason to participate in a vanpool shuttle - Vanpool shuttle participants are doing their part to save Utah's air quality by taking up to 14 commuting cars off the road. Our children, grandchildren, family, friends and neighbors will be able to enjoy the beautiful, clean Utah air for years to come.

For more information please call 801-RIDE-VAN (801-743-3826) or visit utarideshare.com.
